Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Information Technology (GPA: 8.80)

Aug. 2019 – Present

Ranchi, Jharkhand

Relevant Coursework

- Data Structures
- Algorithm Design and Analysis
- Operating Systems
- Object Oriented Programming
- Database Management System
- Computer Networks

Experience

Oracle

Software Engineer Intern

Jan 2023 onwards

Bangalore, Karnataka

- Worked as an intern in the Communications Applications Global Business Unit.
- Part of the team that worked around the Concurrent Charging System

Microsoft

Software Engineer Intern

May 2022 – July 2022

Noida, Uttar Pradesh

- Worked with the team developing the real-time collaborative work environment and its several component packages.
- Developed the people picker to directly access the people datatype component without using the advanced co-authoring features of the real-time editor(Scriptor), reducing the performance overhead added because of Scriptor.
- Improved the user experience by creating a direct invoking function for the datatype and added all text editing capabilities lost due to the removal of the Scriptor.
- Added ways to handle redundant data in the new datatype without causing any change in the reused package.

Projects

Lemonerd | *Nextjs, MongoDB, Firebase* 

June 2021

- A complete blogging website where access to altering the content is restricted to admins and authentication and authorization is done through Firebase.
- Developed the entire frontend of the website which include the individual pages of the blogs, category pages showing the blogs of that category, an authors page with details of all authors, and individual pages of all authors and their work.
- Created the admin page that uses the tinymce text editor, which converts the entire content into HTML text and stores the text content and source of its images in MongoDB along with the images in Firebase storage.

Purple World | *Nextjs, Firebase* 

March 2021

- Developed the entire showcase website for an interior design company called Purple World, located in Bangalore.
- The website mostly comprises of static front-end made using NextJs except for the contact form connected to firebase.
- The authentication and authorization is also done using firebase to give admin access of the submissions of the form.

Portfolio Website | *ReactJs* 

February 2021

- Developed the entirely static frontend website to showcase my skills and profile using ReactJs.
- Designed my own custom image gallery to navigate along the images in the showcase.

Technical Skills

Languages: C/C++, HTML/CSS, JavaScript, TypeScript

Developer Tools: VS Code, Git

Technologies/Frameworks: ReactJs, NextJs, GitHub

Position of Responsibility

IEEE Students' Chapter BIT Mesra

Vice Chairman

September 2019 – Present

BIT Mesra

- Led a chapter of 50+ members to work towards goals that promote and explore various technical domains in college.
- Organized various technical workshops on fundamentals of C/C++, Data Structures and Algorithms, and Git/Github.
- Mentored students in the field of Web Development under IEEE LEAD program.

Achievements

- Winner of Student Branch Associates Program, AISYWLC'20 conducted by IEEE Delhi Section in December 2020
- Winner of IEEE LEAD'20 conducted by IEEE Student's Chapter BIT Mesra June 2020
